

# MICRO MMT

*Portable Communications Security*

The MicroMMT (Multi-Media Terminal) is Motorola's low-cost solution for portable encrypted, voice and data telecommunications security. Practical in size and user-friendly, the MicroMMT installs between a standard analog telephone and the RJ11 TELCO wall jack – making it ideal for small office and home use. Its small, lightweight design also offers the traveler a smart solution for hotel communications security. With the push of a button, the secure mode can be turned on or off. And peace of mind can be ensured.
